

KANISHK CHHABRA

React.js Software Engineer

kanishk.chhabra2000@gmail.com | +91 93104 29178 | Delhi, India | [My LinkedIn profile](#) | [My portfolio](#)

SUMMARY

React.js Engineer with 3+ years of experience shipping high-performance TypeScript applications. Improved responsiveness by 30% and cut UI development effort by 80% on large codebases (200K+ LOC). Strong background in monorepos (Turborepo), modern state management, performance optimization, and AI-assisted development with Claude, Cursor, and GitHub Copilot.

EXPERIENCE

Pantelwar, SDE-1 01/2025 – Present | Noida, Delhi NCR, India

- Owned end-to-end delivery of complex React + TypeScript modules across five enterprise wealth management products.
- Cut UI development time by 80% by building and maintaining shared component systems used across multiple applications.
- Raised performance of a 200K+ LOC React codebase through rendering improvements, better state handling, and focused refactoring.
- Partnered with backend teams to design and integrate REST APIs with secure authentication flows.
- Introduced reusable modules in a Turborepo monorepo that improved code sharing and long-term maintainability.

Pantelwar, Associate Software Developer 09/2023 – 01/2025 | Noida, Delhi NCR, India

- Shipped React dashboards and workflow automation features for portfolio monitoring used by advisors daily.
- Drove a 30% gain in application responsiveness by optimizing data fetching and state management.
- Created advisor dashboards, onboarding flows, and UI components that were adopted across the product.
- Delivered features on schedule through close collaboration with product and backend teams.

PROJECTS

Fingyani Platform – Retail Investment Buckets (Similar to Smallcase), Company project 09/2023 – Present

- Built React interfaces for custom investment buckets across NSE and BSE markets.
- Delivered a 30% improvement in responsiveness through optimized state management and API workflows.
- Reduced advisor-client coordination time by 20% by developing RIA workflows.

360 ONE RM Workspace – Wealth Management Platform, Client project 01/2024 – 06/2025

- Built enterprise dashboards for Relationship Managers handling portfolios exceeding ₹100 Cr.
- Increased RM productivity by 25% with clearer analytics views and streamlined workflows.
- Reduced UI development effort by 80% by designing shared component libraries.

OmnaData-Insights and Analysis, Client project 10/2025 – Present

- Developed a research and analytics platform featuring role-based access and subscription-based report workflows.
- Created management flows that let analysts create, update, and manage research reports efficiently.
- Worked with backend teams on API integration and structured data handling.

Ravokk – E-Commerce Clothing Platform, Personal project

- Built a complete e-commerce platform using Next.js, TypeScript, Zustand, and PostgreSQL with clean component architecture and responsive design.

TECHNICAL SKILLS

Frontend – React.js, Next.js, TypeScript, JavaScript (ES6+), React Hooks, Redux Toolkit, Zustand, TanStack Query, Context API, Tailwind CSS, Material UI, ShadCN UI

Architecture & Tooling – Turborepo, Monorepo architecture, Webpack, Vite, Docker, CI/CD, Git, GitHub

Testing & Quality – Jest, React Testing Library, Performance Optimization, Code Splitting, Lazy Loading

Backend & Database – Node.js, REST APIs, PostgreSQL, MongoDB, SQL

Other – Agile/Scrum, DSA, Problem Solving

EDUCATION

HMR Institute of Technology & Management (GGSIPU), B.Tech – Computer Science Engineering 2019 – 2023
GPA: 8.8/10
