

KANISHK CHHABRA

Software Development Engineer

kanishk.chhabra2000@gmail.com | +91 93104 29178 | Delhi, India | [My LinkedIn profile](#) | [My portfolio](#)

SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications using React.js, Next.js, TypeScript, Tailwind CSS, REST APIs, and modern frontend architecture. Experienced in developing reusable UI components, integrating backend services, collaborating across the SDLC, and delivering high-performance applications in Agile environments. Familiar with Python, PostgreSQL, MongoDB, Docker, and modern web application architecture.

EDUCATION

HMR Institute of Technology & Management (GGSIPU),
B.Tech – Computer Science Engineering
GPA: 8.8/10

2019 – 2023

EXPERIENCE

Pantelwar, SDE-1 01/2025 – Present | On-Site – India
Led UI development for scalable wealth & investment management features across 5 major React projects.
Collaborated with backend teams to integrate REST APIs, authentication workflows, and secure client-server communication across multiple applications.
Integrated 10+ reusable React components, reducing UI development cycles in upcoming releases.
Maintained and optimized large-scale 200,000+ line codebase, improving performance, maintainability, scalability, and overall application stability.
Participated in code reviews, sprint planning, production deployments, debugging, and end-to-end SDLC activities across multiple product releases.

Pantelwar, Associate Software Developer 09/2023 – 01/2025 | Noida, India
Developed data-driven dashboards and workflow automation features improving portfolio monitoring, reporting, and user decision-making.
Integrated multiple REST APIs and optimized frontend data-fetching workflows for improved responsiveness and user experience.
Built client-status tracking, role-based access, advisor dashboards, and improved onboarding UX.
Collaborated in Agile Scrum with daily standups, sprint planning & production releases.

QSpiders – Full Stack Development Training, Trainee 03/2023 – 09/2023 | Noida, India
Training in HTML, CSS, JavaScript, React, DBMS, SQL, Java, Hibernate, Spring basics.
Solved 100+ DSA problems, strengthening algorithms and problem-solving skills.

TECHNICAL SKILLS

Frontend – React.js, Next.js, TypeScript, JavaScript (ES6+), RTK Query, Tanstack Query (React Query), Redux, Redux Toolkit, Context API, Zustand, Tailwind CSS, HTML5, CSS3, Material UI, ShadCN, GSAP, Responsive UI Development, **Backend / APIs** – Python, REST APIs, Node.js, API Integration, Postman, **Database** – PostgreSQL, MongoDB, SQL, DBMS, **Tools & DevOps** – Git, GitHub, Docker, CI/CD Concepts, Jira, VS Code, **Methodologies** – Agile Scrum, SDLC, Code Reviews, Documentation, Cross-functional Collaboration, **Other** – DSA, Problem Solving, Performance Optimization

PROJECTS

Ravokk – E-Commerce Clothing Platform, Personal project
Built a modern e-commerce clothing platform using Next.js, TypeScript, Zustand, Tailwind CSS, and PostgreSQL.
Implemented product browsing, state management, responsive UI components, and database-driven workflows.
Focused on performance optimization, reusable architecture, and seamless user experience across devices.

OmnaData-Insights and Analysis, Client project 10/2025 – Present
Developed a research and analytics platform with role-based access, API-driven data workflows, and subscription-based report access.
Collaborated on backend integration workflows involving structured data processing and secure API communication.
Implemented analyst management workflows for creating, updating, and controlling structured report insights.

Fingyani Platform – Retail Investment Buckets (Similar to Smallcase), Company project 09/2023 – Present
Built UI for custom stock buckets across NSE/BSE markets.
Optimized state management, API-driven data retrieval, and user workflows, improving platform responsiveness by 30%.
Built RIA portal, reducing advisor-client coordination time by 20%.

360 ONE RM Workspace – Wealth Management Platform, Client project 01/2024 – 06/2025
Dashboard used by Relationship Managers handling portfolios worth ₹100 Cr+.
Increased RM productivity by 25% with visual analytics and instant access workflows.
Reduced UI change effort by 80% using reusable components.

PREVIOUS INTERNSHIPS (RELEVANT EXPERIENCE)

AI/ML Intern, IBM Skills Network 12/2022 – 02/2023
Python, Pandas, Machine Learning Fundamentals, Data Analysis

Python Developer Trainee, Besant Technologies 10/2022 – 12/2022
Python, REST API Development, OOP Concepts, Data Structures

Machine Learning Intern, Pantech ProLabs 08/2022 – 10/2022
ML, AI, Data Science
